## Thank you for purchasing from Plum

Plum are the playtime specialists providing the fuel for imaginations to flourish. For over 25 years we've been inspiring fun across the globe. We are passionate about encouraging play in a fun yet safe environment, allowing children freedom of play and parents peace of mind.

## Advisory Section

---

To ensure the safety of you, the installer and your children, it is important that these instructions are read fully before commencing the positioning and installation of this product.

### Keep your sandpit safe for the children

1. Always cover the sandpit when not in use, to prevent unwanted animals from playing in the sand.
2. The sandpit cover is not a toy and is not intended for use by children. Always remove the cover before allowing children to play with the sandpit.
3. Before covering your sandpit, place a large object in the centre of the sand to prop up the cover. This will allow water to drain off the cover, and prevent any rain water from "pooling" in the centre of the sand pit. This must be checked regularly.
4. Should any water still accumulate and form a pool, please ensure that this water is removed. Standing water can pose a danger to children.
5. Regularly check sand for impurities and any other sharp objects that may cause harm to children, including at the beginning of the season.
6. Use washed play sand suitable for use in children's sand pits.
7. Regularly change the sand to ensure that there is no build up of mould and to ensure that the play area is hygienic.
8. In windy and adverse weather conditions place the product in a safe area. In these conditions the product may become a hazard.

9. The sandpit should be placed on a level surface at least 2m from any structure or obstruction such as a fence, garage, house, over hanging branches, laundry lines or electrical wires.
10. The sandpit should not be installed over concrete, asphalt or any other hard surface.

### Timber Advice

This product has been made from premium timber. Great care has been taken in selecting, treating and machining the timber before it is presented to you. Timber is a natural product and as such may experience changes throughout the course of its life. This means it may:

- Develop openings (gaps, slits, apertures, cracks, splits) along the line of the grain. These openings are due to the difference in moisture content between the internal and outer surfaces of the timber. This is to be expected, is totally acceptable and will not affect the integral strength, life or guarantee of the product.
- Warp and distort its shape. Any distortion will be slight and will not affect the safety or enjoyment of this product.
- Fade as the timber reacts with sunlight. The timber should be treated with a proprietary product to act as a protective barrier, i.e. a water repellent, on an annual basis.
- After first year of service treat product with a good quality treatment safe for children's use.

### Routine Maintenance

It is advised that on a regular basis (i.e. at the beginning of the season and monthly thereafter) all main parts/fixings are checked as secure, well oiled (if metallic), have no sharp points/edges and are intact. Replace, oil and/or tighten when necessary. Failure to do so may result in an injury or hazard. Replace defective parts immediately, for further information contact customer services.

### WARNING!

Minimum user age 18+ months • Not suitable for children under 36 months until fully assembled due to small parts - choking hazard • Adult assembly required • Adult supervision recommended at all times • Only for domestic use • Outdoor use only • Retain this instruction manual for your records • Maximum user weight 50kgs
